

ACRATECH

PROFESSIONAL PHOTOGRAPHIC AND IMAGING PRODUCTS

Our new GP-SS Ballhead has all the benefits and features of our GP-s ballhead,, including the ability to function as a gimbal head and as a panoramic head. The GP-SS ballhead has also been designed with a smaller diameter base to allow it to be used with the "traveler" type tripods where the legs fold around the tripod head. The smaller base diameter allows the tripods legs to fold more compactly. The difference between the GP-SS and the GP-S is that the GP-SS has a 1.87" (46mm) long quick release clamp and the GP-S has a 2.37" (60mm) long quick release clamp. Both the GP-S and GP-SS are able to support 25 lbs (11.4kg).

GP-SS BALLHEAD

- Works as a gimbal head with lenses up to 400 f4.0
- Weighs less than 14 oz (.38kg) with QR clamp
- Easily holds 25 lbs (11.4kg) at any angle
- Full movements allow any camera position
- Fully adjustable tension control
- Precision C.N.C. machined
- Fits all Arca-Swiss compatible QR plates
- Fits all standard tripods (1/4-20 and 3/8-16 threads)
- Laser engraved dual degree markings
- Solid precision feel
- Beautiful satin black anodized finish
- Long lasting stainless steel hardware
- Knobs are secured so they cannot fall off
- Ball will not shift once tightened
- Made in U.S.A.
