

ACRATECH

PROFESSIONAL PHOTOGRAPHIC AND IMAGING PRODUCTS

Our new GP-s Ballhead has all the benefits and features of our GP ballhead, including the ability to function as a gimbal head and as a panoramic head. But the GP-s ballhead has been designed with a smaller diameter base to allow it to be used with travel type tripods where the legs fold around the tripod head. The smaller base diameter allows the tripods legs to fold more compactly.

GP-s BALLHEAD (small diameter base)

- Works as a gimbal head with lenses up to 400 f4.0
- Weighs less than 1 lb (.45kg) with QR clamp
- Easily holds 25 lbs (11.4kg) at any angle
- Full movements allow any camera position
- Fully adjustable tension control
- Precision C.N.C. machined
- Compatible with Arca-Swiss compatible QR plates
- Fits all standard tripods (1/4-20 and 3/8-16 threads)
- Laser engraved dual degree markings
- Solid precision feel
- Beautiful satin black anodized finish
- Long lasting stainless steel hardware
- Knobs are secured so they cannot fall off
- Ball will not shift once tightened
- Made in U.S.A.
