

SPHERICAL PANORMIC HEAD

Our new Acratech Spherical Panoramic Head allows you to shoot spherical panoramic images and to also do VR photography. It is designed to be used with Sigma (Canon and Nikon mount) 8mm 3.5 fisheye lenses. Using software such as PT Gui, the 4 fisheye images can be stitched together to create spectacular images.

- Weighs less than 1 lb.
- Indexes in 90 degree increments.
- Reference marker for 1st shot, 2nd shot etc.
- Panning base allows full 360 degree rotation.
- A specially machined flat provides a surface for compass orientation.
- Machined notch in the lens mounting ring allows for easy lens installation.
- Laser etched focus mark provides fast focus reference and a quick and easy way to verify that your camera is positioned exactly vertically.
- Large easy to read 15mm bulls eye level.
- Locking lever clamp
- Precision CNC machined from 6061 T-6 aluminum and stainless steel.
- Precision laser etching cannot wear or rub off.
- Solid precision feel.
- All knobs are secured so they cannot vibrate loose or fall off.
- Beautiful satin black anodized finish.
