

# ACRATECH

PROFESSIONAL PHOTOGRAPHIC AND IMAGING PRODUCTS

*Laptop computers a real convenience for the digital photographer, but when it comes to working on images, laptops can be difficult. The brightness of the image appears to change as your viewing angle to the screen changes. It is difficult to know exactly what your image is going to look like. Even with a calibrated monitor you can never be sure you are seeing your image accurately. This has all changed with our new Acratech Viewing Angle Gauge, making it easy to ensure that you are always looking at you monitor from the correct angle and you are centered on your screen for accurate viewing. We all are looking for WYSIWYG (What You See Is What You Get), now it is even possible on your laptop.*

## Viewing Angle Gauge

- *Allows you to quickly verify that you are viewing your screen at the correct angle for accurate color, contrast and brightness*
- *Made from aircraft quality aluminum*
- *Quickly installed or removed with Velcro tabs*
- *Does not need to be removed to close your laptop*
- *Made in the U.S.A.*
